MONTARA WATER AND SANITARY DISTRICT AGENDA

For Meeting Of: **January 15, 2026**

TO: BOARD OF DIRECTORS

FROM: Clemens Heldmaier, General Manager

SUBJECT: Review and Possible Action Concerning Approval to Accept Federal Funding Secured by Congressman Liccardo for Seal Cove Coastal Resilience Project

Following accelerated land movement in the Seal Cove area in early 2025, the District actively advocated for county, state and federal support for the Seal Cove area.

Congressman Sam Liccardo was quick to connect with the District, requesting projects and funding needs to support our community following this disaster.

Staff proposed the Seal Cove Coastal Resilience Project to secure portions of the District's infrastructure in Seal Cove which required stabilization due to accelerated land movement.

On January 8th, Congressman Liccardo's Office informed the District that $1.092M has been secured for this project in the House of Representatives bipartisan funding bill.

With the December release of the San Mateo County 2025 Seal Cove Geologic Study, staff are reviewing the study, the proposed project and examining any additional infrastructure needs.

Staff wish to express our thanks to Congressman Liccardo and his team who secured funds that would benefit all ratepayers by assisting the District to maintain service to Seal Cove.

Recommendation:

Authorize the General Manager to accept Federal Funds for the Seal Cove Resilience Project.
